COPPER STRIKE CLOSE TO TOWN

Consolidated Jefferson Shaft Drops Into Native Copper Ore.

UNCLE SAM'S DIVIDEND

BOG MINE, IN AMERICAN FORK, TAPS FINE ORE.

Consolidated Jefferson company, which is systematically developing a large group of claims between the mouths of Big and Little Cottonwood canyons, about four-teen miles southeast of this city, is ex-ulting over a strike that has just been made in the bottom of a working shaft that is being sunk on Jefferson ground. Mr. Hoock stated yesterday that at a Mr. Hoock stated yesterday that at a depth of a little more than 275 feet the entire bottom of the shaft, is in ore that is literally shot full of native copper. No, assays have yet been made on the rock, as the management is getting octer looking material with every snn. swork, it has the appearance, however, of running well up in the red metal and there is no question but what it will carry some value in gold and silver as well, as that is characteristic of all the ore that has been found in the ground. The shaft will be continued on down to the 306-foot level, no matter what is found in sinking, and the probabilities are that the vein will then be opened by drifts and cross-cuts. Mr. Hoock also reports that a fine showing is now being made in the company's Josephine group of claims in the same section. This ground is being prospected through a tunnel and a strong vein has been tapped. Horn silver is making in the ore found here, and the prospects for big things resulting from the campaign now being executed are most fiattering.

paign now being executed are most itering.

A few years ago some rich gold-copy silver ore was shipped from proper now embraced in the Consolidated Jeft son company's holdings, but the own were unable to properly equip and velop the ground. The veins near surface were not large enough to provenough of the ore to meet the expe of heavy work, so the ground was fins secured by the present company. Mo was raised and a plan of campaign clided upon that involved the opening the ground at depth by shaft and tun and that is what is now being done, sults are beginning to show that the was fully justified.

COPPER METAL MARKET.

Everything Points to a Much Higher Price in Near Future.

Price in Near Future.

There is danger of a runaway copper market, says the Boston Commercial. Lake and electrolytic are selling for 15½ to 15% cents per pound, and there are more buyers than sellers. Most producers have sold their product as far ahead as October, and are out of the market except for later dates. There is a strong demand for spot deliveries, and it is this that is forcing prices higher. The efforts of the leading producing and selling interests to prevent this advance in prices have been in vain. They felt that 15 cents per pound was high enough, and as consumers seemed well satisfied with a steady market at that level, it was thought best to discourage speculation and to deliver all their copper as rapidly as it could be produced and refined. By this means the market was held down to 5 cents for several months, though it was a period of steadily gaining consumption. Exports of copper during July, so far reported, were 17,213 long tons. It is expected that Pacific port shipments, when all in, will swell this to above 18,000 tons. It is understood that the falling off in July was due to some arrangement between some domestic producers and foreign consumers by which certain shipments were delayed until this month. The foreign demand continues very strong, with the exception that there has been a

Those who can see nothing but calamity in the business world, and who pretend to doubt the legitimacy of the present demand for copper, will do well to study the instrument statement for June, put out this week by the American Telephone company. It gives the net output of telephones for the month as 68,128, compared with 39,168 in June of the previous year, something like a 40 per cent increase. The total increase in the company's outstanding telephones in the twelve months was 970,631, or nearly 25 per cent. When it is realized that each of these 570,631 new instruments installed, as well as the scores of thousands of others that were put out by independent companies, required a circuit of copper wire, besides coils, switches, switchboards, etc. It becomes plain that the telephone business alone must consume the product of at least one very large copper mine. This growth in the use of the telephones constitutes a reflection of industrial progress and expansion that cannot possibly be misleading.

stitutes a reflection of many and expansion that cannot possibly and expansion that cannot possibly misleading.

While it is to be hoped that there will be no stampede, it cannot be denied that the price of copper is likely to be forced up to 16 or 18 cents per pound. If agreessive buying for Chinese account should be resumed immediately, the price might go to 20 cents. As all the copper that the mines and reduction works of the world can put out is now coming to market, there would be no supplies of market, there would be no supplies of metal to take care of a further sudden expansion of demand.

UNCLE SAM DIVIDEND.

Directors Order Payment of \$5,000

on the 19th of Present Month.

The Uncle Sam Consolidated Mining company declared another \$5,000 dividend yesterday, that sum being the equivalent of 1 cent a share on the capital stock of the corporation. Distribution is to be made on the 19th of the present month and books for the transfer of stock will close on Saturday next, the 12th, to reopen on the 21st.

When the directors gathered in regular monthly session yesterday afternoon all accounts against the company were approved. Following that reports from Superintendent C. C. Griggs and Secreary W. M. Thompson on the physical ondition of the mines and the state of the company's exchequer, respectively, it as promptly decided to make the distribution, as stated.

It was intimated several days ago that the state of the st

Two Feet of Galena Carrying Copper

Encountered in Tunnel.

Frank L. Hines, who is largely interested in the Bog mine in American Fork canyon, is in receipt of advices from his father. Ed Hines, that a big strike has been made in the property. For some little time back small bunches of gray copper and galena have made their appearance in the tunnel workings, but there was nothing to indicate a permanent ore body. Now Mr. Hines is advised by his brother that he has been pushing the tunnel level through two feet of solid galena, carrying a high percentage of copper, and he believes that the long-expected permanent shoot has at last been reached. He has gone into it for a distance of eight feet and it appears to be getting better as he advances. Some of this ore carries, in addition to the lead and copper, about 400 ounces in silver per

tined to make good money out of the property. Ed Hines has clung to the camp for twenty years or more and he deserves everything that may come to him for his perseverance and pluck. He owns several pieces of property outside of the Bog mine, and, with the latter in the producing list, it will not be long till he is able to give some of his other holdings the attention they deserve.

Secomes Active and Moves

Up a Peg or Two.

Up a Peg or Two.

Up a Peg or Two.

During yesterday's trading on the mining exchange a total of 27,400 shares of stock, the selling value of which was \$4,656, changed hands. Daly went at \$1.80, and Daly-Judge released 100 at \$3.50. Lower Mammoth did business at 27c to 28c, and May Day, which has been inactive for the last few days, showed life, and, with 20,000 shares changing hands, make the work of the stock going at the latter figure. New York sold at 52% and 52% can be recovered and that the propagation of the stock of the stock going at the latter figure. New York sold at 52% and a little Uncle Sam was picked up at 29c.

Following is the list of final quotations and record of sales made during the day:

UPS AND DOWNS OF THE MARKET

Opening Prices Showed Mixed Gains and Losses.

SMALL VOLUME OF TRADE

DULLNESS THE PRINCIPAL FEA-TURE OF WALL STREET.

New York, Aug. 9.-Opening prices on the stock exchange today showed mixed gains and losses, and prices moved in contrary directions in different parts of the list throughout the day. There was scarcely a time when a consistent tone was perceptible, so irregular and mixed was the movement. Here and there in the list throughout throughout the list throughout the list throughout through throughout throughout throughout throughout throughout through throughout through throughout throughout throughout throughout throughout through throughout throughout throughout throughout through throughout throughout throughout throughout throughout throughout throughou was the movement. Here and there in the list new high records were made and an active demand for one or two of the standard market leaders relieved the trading from its appearance of being given over entirely to the less prominent specialties. The strength of these influential stecks was obviously taken advantage of to effect sales of realizing profits. specialties. The strength of these influential stocks was obviously taken advantage of to effect sales of realizing profits at different points. Some of the less conspicuous stocks recently rushed to a great height proved soft and made wide declines. The volume of dealings shrunk to some extent and there were periods when the duliness was more intense than for a long time, but the character of the market was not essentially changed.

Selling of any importance was only in evidence as prices were bid up to meet the ideas of holders of stocks, and it was when bids were withdrawn and quotations allowed to sag that the duliness of the market became most profound. The news bearing on values was of the same general tenor as for some time past and served to keep up the spirit of confidence in business and industrial conditions which form the underlying basis for the firm undertone of the present market. The actual opening of the peace conference at Portsmouth, N. H., did not change the recently prevalent view of finat event held in the financial district, which may be described as one of confidence in ultimate peace, but with a conservative reservation against possible complications.

It is the general feeling, nevertheless.

Steel Car.... Preferred 'ull. Pal. Car...

Chicago, Aug. 9.—Rumors of damage to

reservation against possible complications.

It is the general feeling, nevertheless, that a rupture of negotiations and a determination to continue the war would precipitate a hazardous situation in the financial markets. So far as the immediate effect in this market would be concerned, the determination by the Japanese government of its disposition of the large funds on deposit here to its credit would be the prime factor.

The expectation that the government report on the grain crop to be published tomorrow will be very favorable was a sustaining influence on the grangers today. St. Paul showed the belated benefit also of its good June net earnings statement published yesterday. Amalgamated Copper was aroused from a long dormant state, after having been entirely unresponsive yesterday to an additional advance in the price of copper announced then. Smelting resumed its flight to new high record levels without definite news announcement to account for it. The coalers showed some effect on profittaking on their recent advance, although Delaware & Hudson sold up to a new
